Project

Lifesaver

How Project Lifesaver Works?

Project Lifesaver relies on radio technology and specially trained Sheriff's Officers. Clients that are enrolled in the Project Lifesaver program wear a personalized wristband that emits a tracking signal. This one-ounce battery-operated radio wrist transmitter emits an automatic tracking signal every second, 24 hours a day. Each bracelet has a unique radio frequency. The Sheriff's Office Project Lifesaver Task Force is equipped with special tracking equipment that can receive each radio frequency up to about one mile. In the event that a client becomes missing, the caregiver will immediately call 911 and the Task Force will be deployed to the client's last known location.

Who Benefits from The Program?

The elderly impacted by:

- Alzheimer's Disease
- Dementia

Children with developmental disorders such as:

- Down Syndrome
- Autism

How can I get this assistance for a loved one?
