**About Teetertown Preserve**

147 acres were originally acquired at Teetertown Preserve in the Hollow Brook ravine to protect one of the most significant natural areas in Hunterdon County. This section offers the solitude of a densely wooded area including hardwoods, shrubs, and animal life. It also showcases a spectacular rushing stream winding its way through dramatic rock outcroppings. In 1999, adjoining acres were purchased, adding large fields and two ponds and bringing the total to 305 acres. Diverse habitats encourage many different types of birds, including Tree and Barn Swallows, Eastern Bluebirds, and Indigo Buntings. Adjacent to Teetertown is the 232-acre Crystal Springs Preserve. As its name implies, this preserve is an important source of water for NJ. Its five ponds represent the headwaters of the Spruce Run Creek.

Teetertown contains the highest elevation in Hunterdon County at 1,051 feet above sea level. This elevation is located in the section between Sharrer Rd. and Pleasant Grove Rd. The two ponds are excellent for bass and bluegill fishing (catch and release only). Trout fishing is permitted in Hollow Brook. The large pond is also stocked with Rainbow Trout. Fishermen must display an NJ Trout Stamp to keep trout, per season limits. Trout. Fishermen must display an NJ Trout Permit before entering the preserve.

**Trails Within the Preserve**

All trails are clearly recognizable and are good for hiking, biking, or horseback riding, except the Blue Trail which is for hiking only.

**White Trail:** The 0.6 mile White Trail consists of old logging trails. It connects the Blue and Red Trails with Hollow Brook Road. Portions of this trail parallel a stream and pass old rock walls.

**Red Trail:** This 1 mile trail winds through the upper portion of the ravine. About halfway, the trail enters a field. The trail parallels and then re-enters the woods. Campsites are along this trail.

**Blue Trail:** Starting from the White Trail, this 0.6 mile trail crosses a stream, proceeds inside a small ravine, exits over a rock wall, and passes many wetland plants. The end of the trail follows along the top of the ravine with a splendid view of the valley. It turns and proceeds down a very steep hill to the road. Follow the road to the left to return to Hollow Brook Road and the ravine.

**Pond Trail:** This trail connects the Teetertown Ravine trails to the fields, ponds, and campsites of the Mountain Farm Section. The trail crosses a gently sloping hillside, passing through a field filled with beautiful seasonal wildflowers. Access to the group campsites is off the Pond Trail’s spur line.

**Old Orchard Trail:** This 0.6 mile trail winds around what was once a peach orchard. As you walk this path, notice the pile of rocks cleared from the field by farmers. Autumn Olive, staghorn sumac, and multiflora rose are a few of the plants that have started to take over the field. The thickets along the fence are excellent places for birds to feed and find shelter. Bluebirds are often seen here.

It is the policy of the County to provide reasonable accommodations to persons with disabilities upon advance notice of need. Persons requiring accommodations should make a request at least two weeks prior to program attendance.
